

## CE Certified Smart Patch Panel 4-Core

### Overview

Constructed with a robust steel enclosure, this 4-core patch panel offers superior mechanical protection, EMI shielding, and durability. While not referring to "steel fibers" (a misnomer), the term denotes the metal chassis that safeguards delicate fiber connections in demanding. Belden PatchPro® offers a complete intelligent ready physical layer management system that uses RFID (radio frequency identification) technology for wireless identification of individual patch cords and real-time monitoring of unintended physical changes in network infrastructure. Belden offers a. The Siemon LightVerse® system includes a range of Fiber Modular Patch Panels, designed to provide users with a flexible solution for deploying fiber optic connectivity in high-density data center and intelligent building environments where fast deployment and simple maintenance is required. for optical fiber networks. Intelligent panels communicate with and receive power from the SmartPatch network scanner, which in turn communicates with the SmartPatch software over the network. LEDs above each port are used to trace connectivity by panel without the antenna. SmartPatch Fiber LC.
