

Croatian Fiber Optic Red Light Source Hot Selling Model

Overview

The FIBERLIGHT model is the top-selling model of all fiber red light sources. It has a robust metal pen design and can typically couple 700 μW into an SM fiber and 800 μW into a 50 μm multi-mode fiber. The B5 Rechargeable Red Light Pen is a professional 650nm visual fault locator designed for fiber optic network maintenance, installation, and troubleshooting. Its advanced rotary automatic lift laser head ensures smooth operation, while the integrated LED lighting improves visibility in low-light. The state, throughput, and identification of an optical fiber can be easily checked with fiber testers by coupling highly visible laser light into the optical fiber. Our selection includes multimode, single mode and quad light sources, with FC, LC, SC, ST connectors and universal adapters. Usually. This less known light technique is more and more applied lately because of it's decorative effects and technical features that are not achievable with any other technique.
