

Distribution box and portable socket

Overview

A Portable Socket Box (or Portable Distribution Box) is a compact, self-contained unit that provides multiple power outlets from a single heavy-duty industrial inlet. It's designed to safely distribute power in locations where fixed wiring is unavailable or impractical. Our butyl rubber outlet boxes are essential for reliable electrical distribution and electrical connection of all your site lighting and equipment. Thanks to integrated circuit breakers, they enable safe transmission of electrical current (230V) and protect you and your equipment from electrical. Compliant with European/international standard EN/IEC 60309-2 The products have passed a variety of performance tests, whether in product temperature risemechanical life, material flame retardant, high pressure resistance, vibration, high temperatureresistance, low temperature, or dust, pollution. Global Recycled Standard (GRS) certified products contain recycled content that has been independently verified at each stage of the supply chain, from the source to the final product and meet social, environmental, and chemical requirements. For more information, please download the album. 5 m OPD 5x4 mm² with CEE plug 32A 400V 5p IP44.
