

Does the Huawei S1700 optical module need configuration

Overview

Web-managed S1700 models come with a web network management system, making it easy to configure switches. Page 15 Documentation Bookshelf About This Document About This Document Intended Audience Depending on management types, S1700 series switches are classified into unmanaged switches, web-managed switches, and web/SNMP-managed switches. This document provides links of recommended documents for. All or part of the products, services and features described in this document may not be within the purchase scope or the usage scope. Unless otherwise specified in the contract, all statements, information, and recommendations in this document are provided "AS IS" without warranties, guarantees or. Most S1700 models provide optical and electrical GE uplink ports, which facilitate user access and are cost-effective. The S1700 is easy to manage and maintain and comes with. Below you will find brief information for Ethernet Switch S1700 Managed Series V100R007C00. The S1700 supports layer 3 static.

Article Content

Installing an Optical Module

The method used to install a copper transceiver module is the same, except that the copper transceiver module connects to a network cable instead of optical fibers. Never look directly into an optical

Displaying Optical Module Information

When certifying an optical module, Huawei comprehensively verifies the functions of the optical module to ensure the optical module quality. The functions include the installation and removal, transmit and

Huawei S1700 Series Switches Product Datasheet

The S1700 provides a range of security features, including 802.1x, RADIUS, Portal and NAC. The S1700 also supports packet filtering based on MAC addresses or ports in order to defend against hackers

HUAWEI S1700 Managed Series V100R007C00 Ethernet Switch Web

This Web User Manual describes the product settings and management of S1700 Managed Series V100R007C00 based on Web. It provides information on how to configure, monitor, and troubleshoot

What Can I Do If a Message Is Displayed Indicating that an Optical ...

For example, if a non-XGE optical module is installed on an XGE port, the rate of the optical module does not match the port rate. In this case, replace the current optical module with a supported optical

Rules for Optical Module Interoperation

If you need to achieve interoperability between optical modules with different standards, contact technical support personnel. When S series devices are connected to other products such as

S1700 Series Enterprise Switches

The S1700 supports Energy Efficient Ethernet (EEE) that enables the switch to enter power-saving mode when the traffic is light. The S1700 can adjust power output for transmissions based on the

Optical Module Solutions for Huawei S5700/S5720 Series Switches

When using switches, we may encounter many confusions, such as what types of optical modules are needed for different models of Huawei switches, and how to resolve issues encountered

Displaying Optical Module Information

The optical module design does not comply with the EMC, its anti-electromagnetic interference capability is low, and the optical module brings electromagnetic interference to surrounding devices.

S200 AND S1700 SWITCH PRODUCT DESCRIPTION

When configuring your device, alter the configuration depending on your use case. The specifications provided in this document are tested in a lab environment (for example, a certain type of cards have

How to View Optical Module Parameters

Using a Command If an optical module is installed in a running device, you can run the display transceiver command to view parameters of the optical module, including the center

Logging In to a Device for the First Time

Logging In to the Device for the First Time Through the Web System Only a device with factory defaults can be logged in through the web system for the first time. To log in to a device through the web

S1700 Series Enterprise Switches

All S1700 ports provide Layer 2 wire-speed forwarding capabilities to ensure non-blocking packet forwarding. S1700 models provide optical and electrical GE uplink ports, which facilitate user access

Product Description

S1700-52R-2T2P-AC provides swappable Small Form-Factor Pluggable (SFP) optical modules for optical fiber connections. The length of optical fibers can be selected according to the transmission
