

Egyptian Construction Site Electrical Distribution Box Model List

AI Overview

Egyptian construction sites use a variety of electrical distribution boxes, including type-tested LV panels, MV switchgear, and specialized models like AL1, BLOKSET, and Schneider-approved panels.

Common Electrical Distribution Box Models in Egypt

- BLOKSET Tested Switchboards**
 - Designed according to IEC 61439-1 and -2 standards
 - High power capacity up to 7000 A
 - Protection level up to IP54
 - Modular and open-ended design
 - Uses Schneider Electric LV components for high safety and reliability
- KSA Type Tested LV Panels**
 - Approved by Schneider Electric as Eco Expert
 - High-performance low voltage panels for safe and efficient power distribution
 - Durable metal enclosures and ergonomic control desks
 - Suitable for administrative, banking, and wastewater projects
- AL1 Model Power Distribution Box**
 - Specially designed for subway stations and high-protection applications
 - High protection level and centralized switching for circuit management
 - Manufactured by Hangzhou Dagang Electric Co., widely used in Egyptian infrastructure projects
- Westinghouse LV and MV Switchgear**
 - Includes form 3 and form 4 metal-clad switchboards
 - Medium voltage switchgear and compact substations
 - Designed for diverse project requirements with high protection standards
- EGEMAC Distribution Cabinets**
 - Covers 400 V to 500 kV applications
 - Includes low and medium voltage distribution panels

Standards and Specifications

EDMS (Egyptian Distribution Material Specifications) defines requirements for:

- MV CTs and VTs (EDMS 17-400, 17-401)
- HRC Fuses (EDMS 19-400)
- Indirect Smart Meters (EDMS 20-305)
- Protection levels (IP, IK ratings), circuit breakers (C.B.), load break switches (L.B.S.), and automation systems (DA, SA, SCADA, ADMS),
