

How much does a 10-meter multi-mode pigtail cost

AI Overview

A 10-meter multimode fiber optic pigtail typically costs between \$15 and \$50, depending on fiber type, connector, and quality. Pricing Overview The cost of a multimode fiber pigtail depends on several factors:

- Fiber Type:** OM1, OM2, OM3, and OM4 fibers differ in core size and bandwidth. OM3/OM4 (10G capable) are generally more expensive than OM1/OM2.
- Connector Type:** SC, LC, ST, or FC connectors affect price. LC connectors are common in high-density data centers, while SC and ST are often used in legacy networks.
- Polish Type:** UPC (Ultra Physical Contact) connectors are standard, while APC (Angled Physical Contact) connectors are more expensive due to lower back reflection.
- Quality and Testing:** Factory-terminated pigtails with tested insertion loss and return loss are priced higher but ensure reliable network performance.

Typical Price Range

- OM1/OM2 multimode, standard SC or ST connector: \$15–\$25 per 10-meter pigtail.
- OM3/OM4 multimode, LC connector, 10G capable: \$30–\$50 per 10-meter pigtail.

Additional Considerations

- Bulk purchases often reduce the per-unit cost.
- Some suppliers may charge extra for custom lengths or pre-terminated pigtails with specific testing certifications.
- Prices vary by region and supplier; checking multiple vendors like FS, FiberOptics.com, or MCL Data Solutions can help find the best deal.

Choosing the right pigtail involves balancing fiber type, connector compatibility, and network performance requirements with budget constraints.
