

How to expand the capacity of fiber optic cables in Costa Rica

Overview

The Instituto Costarricense de Electricidad (ICE), through its commercial brand, kölbi, has announced the integration of the next-generation TAM-1 submarine cable, a strategic infrastructure project that will expand the country's international connectivity capacity 23-fold. The 7,000-kilometer cable will run along the Atlantic coast, connecting the United States to South America, significantly reducing latency—the delay between an action and its response—a critical factor for real-time applications like video calls, online gaming, and financial trading. Following the successful completion of Phase 1 in 2025, which connected eight major. The announcement, made on November 5, 2025, details the completion of the project's first phase, which focuses on the rugged stretch between the Zurquí Tunnel and the city of Guápiles. This initiative addresses a long-standing communication gap by deploying new mobile and fiber optic.
