

# Peru CIF Price for Long-Distance Optical Cable G 652D

## AI Overview

The CIF price for G.652D long-distance optical cable in Peru is influenced by global supply-demand dynamics, raw material costs, and shipping, with typical bulk prices ranging from \$0.03 to \$0.45 per meter depending on volume, cable type, and supplier.

**Current Market Context** G.652D optical fiber, a low-water peak single-mode fiber, is widely used for long-distance terrestrial networks due to its low attenuation and high bandwidth capabilities, supporting 10G, 40G, and 100G Ethernet systems. Prices have been rising in 2025–2026 due to increased demand from FTTH deployments, 5G rollout, AI data centers, and long-haul backbones, while supply has tightened because production capacity cannot keep pace with global demand.

**Price Factors**

- Raw Materials:** Silica preform costs directly affect fiber prices. Fluctuations in silica and copper (for hybrid cables) can increase CIF costs.
- Cable Type:** Standard single-mode fiber costs \$0.09–\$1.49 per foot, with armored or specialized cables commanding higher prices. Bulk orders over 100,000 meters can reduce per-meter costs by over 50%.
- Supplier Tier:** Tier-1 manufacturers with verified quality may charge a premium, while direct factory sourcing from China or Asia-Pacific can offer competitive pricing.
- Logistics and CIF Costs:** CIF pricing includes shipping, insurance, and freight to Peru. Costs vary based on port, shipping method, and import tariffs. Latin American import logistics can add 10–20% to the base cable price.

**Estimated CIF Price for Peru**

Based on current market trends and bulk procurement data:

- Small to medium orders (1,000–10,000 meters): \$0.25–\$0.45 per meter CIF Peru, including shipping and insurance.
- Large-scale orders (100,000+ meters): \$0.03–\$0.15 per meter CIF Peru, benefiting from economies of scale and direct manufacturer pricing.
- Specialized armored or reinforced cables: \$0.50–\$0.80 per meter CIF Peru, depending on specifications.
