

Price of Small Fiber Optic Connector Boxes

AI Overview

Small fiber optic connector boxes typically range from \$10 to \$50 depending on size, port capacity, and features. Price Range and Options Amazon Listings: Compact fiber optic wall-mount boxes with LC couplers for single-mode or multimode cables are available, generally priced around \$15-\$30 for small 2-6 port enclosures. A 2-in 2-out optical cable junction box made of durable ABS+PC material is priced similarly, offering waterproof and impact-resistant protection for indoor or outdoor use. Industrial Suppliers: Small indoor/outdoor fiber optic terminal boxes, such as 2-port or 4-port enclosures, are available from manufacturers like HUBER+SUHNER or METZ CONNECT, with prices starting around \$20-\$40 depending on features like removable splice trays, adapter compatibility, and pre-installed pigtails. Specialized Retailers: FiberMania offers compact termination boxes for FTTH and small networks, supporting 4-48 ports. Small 4-port boxes suitable for residential or office use are typically priced \$15-\$35, with durable enclosures compatible with SC, LC, FC, and ST adapters. Key Features Affecting Price Port Capacity: Boxes with more ports (4-48) cost more than 2-port or 2-in 2-out models. Material and Durability: ABS+PC or reinforced plastic enclosures provide impact and corrosion resistance, often increasing cost. Indoor vs Outdoor: Waterproof and weatherproof boxes for outdoor use are generally more expensive. Included Accessories: Some boxes include splice trays, pigtails, adapters, and mounting hardware, which can affect price. Summary For a small fiber optic connector box suitable for home, office, or small network setups, you can expect to pay \$10-\$50, with most 2-4 port indoor boxes around \$15-\$30. Prices increase for outdoor-rated, higher port-count, or pre-assembled boxes with additional accessories.
