

Price of Vertical Cable Tray Fixing Ties

AI Overview

Vertical cable tray ties typically range from USD 0.05 to USD 1 per piece, depending on material, size, and quantity. Overview Vertical cable tray ties, also known as cable ties, zip ties, or wire ties, are used to secure cables within vertical cable tray systems, ensuring organized and safe routing of electrical and data cables. They are available in various materials including nylon, stainless steel, and UV-resistant polymers, which affect both durability and price. Price Range Standard Nylon Cable Ties: Usually USD 0.05–0.20 per piece for small to medium sizes, suitable for light to moderate cable loads. Heavy-Duty or UV-Resistant Ties: Typically USD 0.30–1 per piece, designed for outdoor or industrial environments where strength and weather resistance are critical. Stainless Steel Ties: Higher-end options for high-temperature or corrosive environments, often USD 0.50–1 per piece depending on size and supplier. Bulk purchases often reduce the per-unit cost, and suppliers like RS Hong Kong and element14 Hong Kong provide fast delivery and technical support for industrial orders. For large-scale projects, sourcing from manufacturers such as Kam Tai Products or Alibaba suppliers can offer customized sizes and materials at competitive rates. Considerations Material Selection: Nylon is cost-effective and versatile, stainless steel is ideal for harsh environments, and UV-resistant ties are suitable for outdoor installations. Size and Load Capacity: Larger ties for heavy cable bundles cost more. Reusability: Reusable ties are slightly more expensive but reduce waste in dynamic installations. Local Availability: Hong Kong suppliers provide quick delivery, which can influence total project cost. For precise pricing, it is recommended to request a quote from local distributors or check online catalogs, as prices fluctuate based on quantity, material, and supplier.
