

Retaliation for Cutting Fiber Optic Cables

Overview

The City of London Police (CoLP) have arrested a 29-year-old man after a climate protest group claimed to have “the wifi systems of hundreds of insurance companies across the UK”, which they achieved by cutting key fibre optic cables in London (similar events are. The City of London Police (CoLP) have arrested a 29-year-old man after a climate protest group claimed to have “the wifi systems of hundreds of insurance companies across the UK”, which they achieved by cutting key fibre optic cables in London (similar events are. Fiber cuts in Van Nuys, California last month resulted in outages for more than 50,000 residential customers and 500 business customers, Charter said, including emergency services and a U. Though undeniably disruptive, local law enforcement doesn't necessarily buy the "terrorism". A fiber cut is a complete or partial severance of a fiber optic cable, resulting in an interruption or degradation of data transmission across the network. While these cables are engineered for durability (with some rated to last 25+ years), they are not invulnerable. This can result in: Internet Outages: Users may experience a complete loss of internet access, affecting both residential and commercial users. Telecommunications. The world is facing an energy crisis as Iran blocked supplies passing through the Strait of Hormuz after strikes by the US and Israel. Vital subsea cables that carry global internet traffic also pass through Hormuz.
