

# Safety Maintenance Signs for Construction Site Electrical Distribution Boxes

## AI Overview

Electrical distribution boxes on construction sites must be clearly marked with high-visibility warning signs to prevent accidental contact and ensure compliance with OSHA and ANSI standards. Key Types of Electrical Safety Signs

**High Voltage Warnings** Signs such as “DANGER: High Voltage” are required on all electrical equipment areas, including temporary power poles, transformer boxes, and generator setups. These signs use red, black, and white colors to indicate that contact could result in serious injury or death and must be visible at all access points.

**Electrical Shock Hazard Signs** Labels like “Caution: Electrical Shock Hazard” alert workers to the risk of electric shock from live circuits or exposed conductors. These are typically placed directly on electrical boxes, circuit breakers, and control panels.

**Lockout/Tagout (LOTO) Tags** When circuits or equipment are de-energized for maintenance, “DO NOT OPERATE” tags must be attached to controls to prevent accidental energization.

**Authorized Personnel Only Signs** restricting access to trained personnel, such as “Electrical Room: Authorized Personnel Only”, help prevent unqualified individuals from entering areas with high-voltage equipment.

**Overhead and Underground Power Indicators** For sites with overhead lines or buried cables, signs like “DANGER: Overhead Power Line” or “Caution: Underground Cables” remind workers to maintain safe distances and avoid accidental contact.

**Placement and Visibility** Signs should be installed at eye level near electrical panels, transformers, and distribution boxes for maximum visibility. Temporary signs must be weather-resistant and durable to withstand outdoor conditions, including sunlight, rain, and dust. High-contrast colors (yellow f...
