

## The world's leading fiber optic cable company

### AI Overview

Prysmian Group is widely recognized as the world's leading fiber optic cable manufacturer. Prysmian Group, headquartered in Italy, holds the position of the largest cable manufacturer globally, with a strong focus on fiber optic cables, energy transmission, and industrial solutions. The company operates over 108 manufacturing facilities across more than 50 countries, enabling a truly global reach and consistent quality standards. Prysmian's fiber optic products are used in submarine networks, 5G infrastructure, and long-haul telecommunications, making it a key player in modern connectivity. Market Leadership and Innovations Prysmian commands approximately 9-15% of the global fiber optic market, surpassing other major competitors. Its product portfolio includes high-tensile, low-attenuation cables, eco-friendly jackets, and bend-optimized fibers for dense urban deployments and next-generation networks. The company also owns General Cable, further expanding its capabilities in fiber optic and energy solutions. Comparison with Other Leaders While Corning Incorporated is a major competitor, known for pioneering low-loss optical fibers and holding around 10.4% of the global market, Prysmian's broader global footprint, extensive manufacturing capacity, and turnkey solutions give it the edge as the leading company in terms of scale and project impact. Other notable players include Sumitomo Electric Industries, Fujikura, and Nexans, which excel in specialized markets and technological innovations. Global Impact Prysmian's fiber optic solutions are critical for 5G networks, cloud infrastructure, and submarine cable systems, supporting the backbone of global telecommunications. Its commitment to sustainability, including the use of recycled materials and reduced carbon emissions, positions the company as a pioneer in environmentally responsible cable manufact...
