

Weak Reflection Fiber Bragg Grating Demodulator

Overview

The invention provides a weak reflection fiber Bragg grating-Fabry-Perot cavity sensor demodulation system, comprising a wide spectrum light source, an optical fiber connector, a sensor, an all-fiber multiple beam interferometer, a piezoelectric ceramic modulator, a. The invention provides a weak reflection fiber Bragg grating-Fabry-Perot cavity sensor demodulation system, comprising a wide spectrum light source, an optical fiber connector, a sensor, an all-fiber multiple beam interferometer, a piezoelectric ceramic modulator, a. The invention provides a weak reflection fiber Bragg grating string demodulator based on deep learning, which is mainly used for demodulation of distributed temperature or stress. The principle of the demodulator is as follows: the central wavelength of the reflected light of the grating is susceptible. Fibre Bragg Grating (FBG) demodulation technology is central to structural health monitoring. FBGs are. A high-speed demodulation technique based on microwave photonics and chromatic dispersion is proposed for distributed weak fiber Bragg gratings (FBGs).

Article Content

Online reflectivity measurement of an ultra-weak fiber Bragg grating

An online measurement method is introduced to ensure the reflectivity of an arbitrary grating in a large-scale ultra-weak fiber Bragg grating (FBG) array. The measurement errors were investigated by

Reflectivity measurement of weak fiber Bragg grating (FBG)

For measuring ultra-weak grating reflectivity, the grating group with an identical wavelength was used. By using anhydrous alcohol and deionized water as the reflecting medium, the

Large-Capacity Interrogation for Ultra-Weak Fiber Bragg Grating Array ...

One demodulation system employed an ASE laser as the light source. The system consists of two semiconductor optical amplifiers (SOAs) and a high-speed charge-coupled device (CCD) module,

Review of Optical Fiber and Integrated Photonic Sensors for ...

Extended fiber-optic networks, including distributed fiber-optic sensing (DFOS) based on Rayleigh, Raman, and Brillouin scattering, together with multiplexed fiber Bragg grating (FBG)

High speed demodulation method of identical weak fiber Bragg

High speed demodulation method of identical weak fiber Bragg gratings based on wavelength-sweep optical time-domain reflectometry . Acta Physica Sinica, 2016, 65 (20): 204209.

High-Speed Demodulation of weak FBGs Based on Microwave

A high speed quasi-distributed demodulation method based on the microwave photonics and the chromatic dispersion effect is designed and implemented for weak fiber Bragg gratings (FBGs). Due

A Fast Demodulation Algorithm for Fibre Bragg Grating Based on

Fibre Bragg Grating (FBG) demodulation technology is central to structural health monitoring. However, spectral distortion and noise caused by complex environments, along with the

Multi-Wavelength Ultra-Weak Fiber Bragg Grating Arrays for Long ...

Abstract: Fiber Bragg grating (FBG) array, consisting of a number of sensing units in a single optical fiber, can be practically applied in quasi-distributed sensing networks. Serious signal crosstalk

High-speed demodulation of weak fiber Bragg gratings based

A high-speed demodulation technique based on microwave photonics and chromatic dispersion is proposed for distributed weak fiber Bragg gratings (FBGs), and the wavelength detection accuracy is

Research on the Ultra-Weak Reflective Fiber Bragg Grating Sensing ...

The demodulation of quasi-distributed fiber Bragg grating (FBG) sensing with high capacity and high spatial resolution is achieved by adopting ultra-weak FBGs and optical frequency domain reflection

Strength properties of femtosecond-induced defects and weak Bragg ...

The mechanical strength of weak reflectors in the form of point defects or weak fiber Bragg gratings inscribed by point-by-point method using femtosecond radiation was systematically

Demodulation method for vibration sensors of ultra-weak Fiber Bragg ...

1. Introduction Ultra-weak Fiber Bragg grating (UWFBG) distributed vibration sensors have gained widespread adoption in perimeter security and structural health monitoring, thanks to their

Fiber Bragg grating-based optical filters for high-resolution sensing ...

Abstract In-fiber Bragg grating filters continue to proliferate, and their applications expand with the rapid advancement of fiber optic component fabrication techniques. Mathematical models for

Progress in Fabrication, Demodulation and Application of Weak ...

A weak - reflection fiber Bragg grating (WFBG) array has been widely concerned due to its characteristics such as single fiber tensile strength and large - scale multiplexing in recent years.

An Ultra-Fast Demodulation Method of Identical Weak FBG Arrays

Abstract: An ultra-fast identical weak fiber Bragg gratings (wFBGs) demodulation method based on multiwavelength reconstruction-equivalent-chirp distributed feedback (RECDFB) laser array and

Fiber-end antireflection method for ultra-weak fiber Bragg grating ...

A novel fiber-end antireflection method for reducing the reflection noise in ultra-weak fiber Bragg grating (FBG) sensing systems is proposed in this study. The principle of fiber-end

A three-points tracking-based high-speed fiber Bragg grating ...

A three-points tracking-based high-speed fiber Bragg grating (FBG) demodulation method based on wavelength-tunable laser is proposed. The wavelength-tunable laser scans just three

A novel demodulation technique for identical weak fiber Bragg grating ...

A high speed quasi-distributed demodulation method based on the microwave photonics and the chromatic dispersion effect is designed and implemented for weak fiber Bragg gratings (FBGs).

Fibre Bragg Grating Wavelength Shift Demodulation with Filtering and ...

A novel approach to fibre Bragg grating spectra processing is proposed. The method is based on the use of nonlinear filtration and raising the spectrum value to the second power. A

High speed demodulation method of identical weak fiber Bragg

A high speed quasi-distributed demodulation method based on the microwave photonics and the chromatic dispersion effect is designed and implemented for weak fiber Bragg gratings (FBGs).

CN105806379A

For overcoming the deficiencies in the prior art, the present invention provides the demodulating system of weak reflective fiber Bragg grating-enamel pool cavity sensor that a kind of...
